

English Language

What will I learn?

This is a course that involves the study of language and, in particular, how it is used in society. There is a coursework module in the second year.

Areas that are included in the syllabus are:

- The analysis of language, including terminology needed to describe language features and their uses;
- Writing for a particular audience;
- How languages develop and change;
- How we acquire language;
- Language and the media;
- Differences between spoken and written language.

Like English Literature, this course will appeal to students who enjoy reading, writing and discussion. The reading will be less focused on Literature. The English Language course will also put more emphasis on analytical skills.

The two courses would be highly complementary: anyone doing English Literature would greatly benefit from the awareness of language developed in English Language; those studying Language would obviously benefit from enhancing their knowledge of how language has been used by writers in different forms and eras.

What happens next?

You could take this course to complement other advanced level courses or to prepare for the A Level part of an Advanced GCE in English Language, which could lead onto higher education in English Language or more general higher education courses.

With further training, you could go into a job related to English Language such as a Teacher, Journalist, or Editor.

You could also go straight into a job as the AS GCE is a recognised qualification that will help you develop the skills, understanding and knowledge that many employers across lots of industries are looking for.

Assessment

During your first year you will cover knowledge and skills for the AS and A Level exams.

Unit 1: Language and the Individual and Society

What's assessed

- Textual variations and representations
- Methods of language analysis
- Children's language development (0-11 years)
